09 Devices and media

09 Devices and media

Pro tips

• Media bypass is a media path. SIP signaling still goes to Teams.

• A meeting room has its own license. It does not inherit a person's Calling Plan.

• SIP Gateway registers compatible phones to Teams. It is not Direct Routing and it is not your SBC.

Interview traps

• Enabling media bypass and expecting AMR-WB. AMR-WB is not negotiated on the bypass path.

• Parking a room account on a personal policy with no device account of its own.

Cheat sheet

Processor path client → Teams media → SBC

Bypass path client → SBC on the same site

Signaling always via Teams

AMR-WB not on bypass

SIP Gateway phone registration, not a trunk

Room its own account and SKU

Facts in the long lessons were checked 14 October 2026. This sheet is a memory aid.
