12 Troubleshooting

12 Troubleshooting

Pro tips

• One call belongs in Call Analytics. A building or a week of calls belongs in the Call Quality Dashboard. The trunk belongs in OPTIONS and the SBC trace.

• Write the hypothesis before you change a dial plan. A certificate miss and a bad normalization rule leave different evidence.

• A CQD average is not that one user's call. Do not quote it as if it were.

Interview traps

• Opening the SBC trace first when Call Analytics already shows the client on a failing Wi-Fi hop.

• Calling both Call Analytics and CQD 'the call log.'

Cheat sheet

One user, one call → Call Analytics

Many calls, one site → CQD

Trunk up? → SIP OPTIONS

Ladder wrong? → SBC syslog

Then change one thing and look again

Facts in the long lessons were checked 14 October 2026. This sheet is a memory aid.

Sources and go deeper
