Ports and protocols

Ports and protocols — commercial Microsoft 365 voice

Firewall prefixes re-checked 15 October 2026. Two lists. Do not merge them.

Direct Routing signaling TCP 5061 TLS to sip, sip2, and sip3

Media low UDP 3478-3481

Media high UDP 49152-53247

Client audio UDP/TCP 50000-50019 DSCP 46 EF

Client video UDP/TCP 50020-50039 DSCP 34 AF41

Client sharing UDP/TCP 50040-50059 DSCP 18 AF21

Client signaling UDP/TCP 50070-50089 DSCP 40 CS5, not configurable

SBC signaling and media 52.112.0.0/14 and 52.120.0.0/14

SBC IPv6 2603:1063:400::/40, media also 2603:1063:100::/40

Teams client optimize 52.112.0.0/14 and 52.122.0.0/15, IPv6 2603:1063::/38

GCC High media 52.127.88.0/21 DoD media 52.127.64.0/21

52.120.0.0/14 is not the client optimize list. 52.122.0.0/15 is not the SBC pair.

GCC High and DoD use different proxy names. Do not copy a commercial ACL.

Browser joins do not use the fixed 50000 desktop ranges.

Signaling stays with Teams. Media bypass does not move SIP off 5061.
