14 Coexistence and CCaaS

Pro tips
? Connect, Extend, and Unify are different media paths. Name the model before you name the product.
? CUCM to Teams through Direct Routing is a certified SBC, often CUBE, with one owner for normalization.
? Webex, UCCE, Genesys, and Amazon Connect each need a named bridge. 'We integrate' is not a design.

Interview traps
? Mapping a CUCM calling search space onto a Teams dial plan as if the objects were the same.
? Letting both CUCM and Teams rewrite the same number.

Cheat sheet
Connect  SBC between the PBX and Teams
Extend  Graph and the client; media stays put
Unify  ACS-native contact-center path
CUCM  partition, CSS, route pattern
Teams  dial plan, usage, route, gateway
One system owns normalization

Facts in the long lessons were checked 14 October 2026. This sheet is a memory aid.
