Pro tips

? Compliance recording is a certified recorder, an application instance, an enabled policy, and a grant. The partner stores the media.

? Join the logs on an identifier you can name: call id, user, queue, and the recorder’s own reference.

? The Erlang C calculator in this campus is a teaching model. It is not a workforce-management product.

Interview traps

? Expecting a Teams call queue to forecast, score adherence, and run quality management.

? Enabling recording without a notice and without granting the policy to the right users.

Cheat sheet

Recording	certified bot, policy, grant, notice
WFM	queue intervals; not a Teams feature
E911	location, then the carrier route
Analytics	CQD, then a model you own, then Power BI
CRM	screen pop on an id you store
Agent	answer, then a human escape

Facts in the long lessons were checked 14 October 2026. This sheet is a memory aid.
