Licensing

The wrong SKU looks like a routing bug. Teams Phone, Calling Plans, Audio Conferencing, resource accounts, and Teams Premium are different purchases.

- The license stack: The wrong SKU looks like a routing bug and survives every SBC reboot.
- Calling Plan flavors: Domestic, international, and pay-as-you-go are different purchases. The country list is part of the product.
- Teams Premium is not PSTN: Premium is a meeting add-on. Treating it as the phone license produces a design that cannot dial.
- Resource account licenses: Attendants and queues fail closed when the resource account has the wrong SKU, or had the right SKU removed in two steps.
- Rooms, common area, and shared calling: Devices and shared numbers have their own license sentences. Copying a user bundle onto a hallway phone wastes money and still may not work.
- A license set you can defend: Interviews and design reviews both ask for the set, not a brand name.

CUCM

Cisco CUBE is one of the SBC families named in this lab’s certification lesson. A certified release can be the Direct Routing SBC between Unified CM and Teams.

The tenant still needs a verified domain on the SBC FQDN, and the user still needs Teams Phone. The studio translator does not open a live AXL session. Confirm the current certified release before you build.

Webex

Teams Phone and Webex Calling are separate clouds. This lab does not describe a feature that registers a Webex Calling user into a Teams tenant.

A number move is usually a carrier port, a certified SBC, or a meetings interop product. Confirm before relying.

UCCE

Unified CCE stays the ACD until you migrate it. Microsoft’s contact-center articles name Connect, Extend, and Unify. They do not name a UCCE connector in the notes this lab cites.

Voice into Teams is still Direct Routing or Operator Connect. The routing script stays on the contact-center product you bought. Confirm the vendor’s current model. Source: **https://learn.microsoft.com/en-us/microsoftteams/teams-contact-center**.

A note from the student behind this lab

This is an independent, free, learning-only student project. It respects every company and vendor. Trademarks belong to their owners. It is not affiliated or endorsed. Concerns go to **https://cyphermonkeylabs.com/#contact** and will be removed or corrected. Nothing is sold. Happy to volunteer for any organization.
