10 Session border controllers

10 Session border controllers

Pro tips

• Certification means that SBC software is supported with Direct Routing. You still configure the vendor release you run.

• AudioCodes, Ribbon, Oracle, and Cisco CUBE are families. The support path starts with that vendor's guide.

• Failover is a second gateway on the voice route that you have rehearsed, not a hostname you hope is warm.

Interview traps

• Opening a Microsoft case for a firmware or DSP fault the vendor owns.

• Cloning the London trunk to Manchester and leaving the certificate name or the OPTIONS target unchanged.

Cheat sheet

Certified list → the release you actually run

Pair primary and secondary, both on the route

Firewall current Teams ranges, both directions

Rehearse fail the primary before the site depends on it

Vendor first when the symptom is on the SBC itself

Facts in the long lessons were checked 14 October 2026. This sheet is a memory aid.

Sources and go deeper

- Certified SBCs for Direct Routing — Microsoft Learn — last checked 2026-10.
- Plan Direct Routing — Microsoft Learn — last checked 2026-10.
- RFC 3261 — RFC — last checked 2026-10.
- Session border controller — Wikipedia — last checked 2026-10. Wikipedia fallback for background. Confirm the vendor page before you change a tenant.

- Microsoft Teams blog index — Community — last checked 2026-10. Community index for the Microsoft Teams blog. This is the index, not a claim that a post discusses this room.
- > **AudioCodes session border controllers** — confirm — last checked 2026-10. Did not open when checked.
- Session Border Controllers (SBCs) | | AudioCodes — Vendor — last checked 2026-10. The longer AudioCodes path did not open. This product URL did.
- Ribbon Communications — Vendor — last checked 2026-10.
- > **Oracle Session Border Controller** — confirm — last checked 2026-10. Did not open when checked.
- Session Border Controller Documentation - Home — Docs — last checked 2026-10. The Oracle marketing URL did not open. This docs index did.
- > **Cisco Unified Border Element** — confirm — last checked 2026-10. Did not open when checked.
